

DIRECTIONS

Immediately Discontinue Use of Chemical Treatments
SHAKE WELL BEFORE USE

For Black & Gray Water Tanks

To clean sensors, add 8 oz. to empty holding tank and fill tank with water. Let stand for about 24 hours. Empty holding tank when convenient to do so.

Continuous Operation Method

Add 8 oz. to empty tank and fill tank 1/2 full with water. Use holding tank as usual. Empty when full.

To keep holding tanks clean and free of sensor problems, **Sensor Power** should be used a minimum of once per year.

NOTE: Level sensors are prone to malfunction for a variety of reasons. **Sensor Power** cannot fix all problems associated with malfunctioning level sensors. This product is not compatible with most other holding tank treatments.

Ingredients: Bacteria, enzymes and natural surfactants.

Caution: Avoid freezing. Store in a cool place. Wash hands thoroughly after each use. Avoid contact with open sores or eyes. **Keep out of reach of children.**

Do not use in fresh water tank.
