

Septic Power is ideal for rejuvenating or maintaining any septic system. This concentrated solution of bacteria & enzymes quickly breaks down build-up & keeps the entire system flowing freely, reducing the frequency of pump-outs & helping to prevent costly maintenance and/or overhaul due to system failure. **Septic Power** is completely safe, natural, and 100% biodegradable.

DIRECTIONS

SHAKE WELL BEFORE USE. This product will not work on inorganic material (plastic, rubber & metal). Please note that the effectiveness of **Septic Power** will be significantly reduced in air temperatures below 45F.

Septic Tanks (1500 gal. capacity)

Shock treatment: Use 32 oz. per 1500 gals. tank capacity. Mix with 1-2 gals. warm water & flush through toilet furthest from tank. Repeat in 1-2 weeks if system is still slow.

Maintenance: Pour 6 oz. per 1500 gals. tank capacity down any drain or toilet every 30 days. With constant or excessive use of acid drain openers, caustic cleaners, bleach, formaldehyde, or other strong chemicals the recommended dosage may need to be increased by 2-4 oz.

Cesspools & Waste Lagoons: Dosage varies by waste concentration. Use 6-12 oz. per 1000 gals. liquid. Premix dosage with warm water & disperse over widest area possible.

Clogged Drains, Disposals & Toilets

Add 6-8 oz. directly to drain or toilet & follow with 8-12 oz. warm water. Let stand for up to 8 hours. For heavy blockage, add an additional dose & let stand for a longer period of time.

Odor Control in Garbage Disposals & Drains

After last use of the day, pour 3-4 oz. into drain & follow with 3-4 oz. warm water. Turn disposal on momentarily. Let stand overnight. Use as normal.

Grease Traps

Use 8-10 oz. per 50 gals. capacity mixed with 1 gal. warm water & pour into trap or closest drain after pump-out. Maintain daily with 1-2 oz. treatment.

Plumbing System Maintenance

To prevent clogs & odor problems, add 1-2 oz. every 30 days to all sinks, tubs, showers, & toilets.

RV's & Boats

Add 2 oz. per 40 gals. of tank capacity to gray & black water holding tanks. Follow with 1 gal. of water. Repeat dosage after each time tanks are drained.

Ingredients: Non-pathogenic bacteria, enzymes, natural surfactants & wintergreen fragrance.

Caution: Avoid freezing. Store in a cool place. Wash hands thoroughly after each use. Avoid contact with open sores or eyes. **Keep out of reach of children.**
