

## **Concentrated - mix with up to 8 parts water.**

**Pet Force** is a concentrated formula which includes powerful enzyme-producing bacteria that are designed to break down & permanently eliminate the stains & odors associated with urine, feces, vomit, blood, food, grease & dirt. **Pet Force** is safe to use on all carpets, upholstery, clothing, bedding & floor surfaces (including wood, ceramic, vinyl, concrete, marble & dirt). This product is safe for use around children & pets.

### **DIRECTIONS**

SHAKE WELL BEFORE USE. Do not use in conjunction with sanitizers or disinfectants as these will neutralize the bacteria. Always test for colorfastness before using on any carpet or fabric. Dilute according to the severity of the stain or odor. Mix with warm water in any suitable container or spray bottle. Only mix what will be used in 2 to 3 days.

#### **Carpeted Areas**

1. Mix **Pet Force** with up to 8 parts warm water & generously apply to affected area until carpet and padding are fully saturated. Agitate area to speed up process.
2. Cover affected area with a damp towel for a **minimum** of 24 hours. Re-moisten towel, if necessary.
3. Remove towel & allow area to fully air dry for **at least** 48 hours.
4. For large or heavily soiled areas it may be necessary to repeat the process, but only after the area has **fully dried**.

#### **Other Floor Surfaces (including outdoor areas)**

Mix **Pet Force** at the desired dilution ratio and saturate area. Scrub if necessary & allow area to completely air dry.

#### **Carpet Steam Cleaners**

Mix 2 oz. per gallon of water directly into reservoir. Can also be mixed at a 1:1 ratio & used as a pre-spray or after-spray.

#### **Skunk Odors**

Mix with equal parts water & wash pet. Allow to set for 30 minutes. Rinse pet. Wash pet with regular shampoo.

#### **Laundry**

Apply **Pet Force** at full strength to stain & wash as usual.

#### **Carpet Cleaning Professionals**

When used in conjunction with truck-mounted carpet cleaning machines, the best method for removing stains & odors is to apply a diluted solution directly onto the problem area as a pre-spray & then clean carpet as normal. For heavily soiled areas it may be necessary to apply an after-spray that should be allowed to air dry.

**Note:** Exercise caution when adding **Pet Force** directly to cleaning solution lines, as it may coagulate at temperatures above 180° F.

**Ingredients:** Non-pathogenic bacteria, enzymes, natural surfactants & lemon fragrance.

**Caution:** Avoid freezing. Store in a cool place. Wash hands thoroughly after each use. Avoid contact with open sores or eyes. **Keep out of reach of children.**
